

# DRAW WIRE ENCODER

"High strength stainless steel wire"

**AWE 310** 

#### **GENERAL FEATURES**

- Different stroke (measuring) lengths between 0...5000 mm and 0...10000 mm
- Incremental output
- Stainless steel measuring wire
- IP53 protection class
- Compact design
- Easy installation
- 2 m/s maximum speed
- Shock/Vibration resistant
- Aluminum anodized body

AWE 310 wire encoders convert linear motion into incremental digital pulses. Different stroke (measuring) lengths between 0...5000 mm and 0...10000 mm are available. Optionally other stroke lengths, resolutions, cable lengths and socket connectors can be requested.

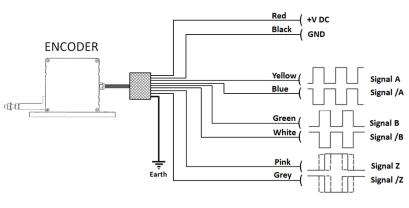

They make measurement by pulling and rewinding stainless steel wire. Usage is practical and usage area is quite wide. By connecting to a counter or position controller, they become a perfect system in high resolutions for position control in wood processing, marble machines, glass processing machines and other machines.

#### **ELECTRICAL CONNECTION**

In the left tablet he cable colors of sensors output signals are given. If the control circuit is suitable in the Line Driver sensors of the not output signals (/A, /B, /Z) have to be added to the system. If it is not suitable /A, /B, /Z signal cables must be fixed as insulated separately. Don't forget that these edges have electricity too.

## **MOUNTING AND WARNINGS**

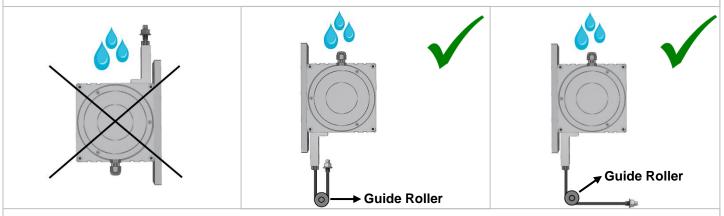

1. Never release the wire after pulling. Otherwise, the coil spring will be damaged.

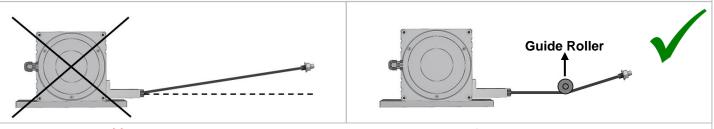

2. Mount the sensor according to the mounting directions shown below.

3. If there is a trickle of water (like a rain), the wire outlet must not be a drip of water upstream. If needed please use guide rollers.

4. The wire should not be pulled in angular. If needed, please use guide rollers.

Important Note(!): Failure to comply with these recommendations, the malfunctions that may occur will not be under the warranty.
